The following information is based on EPA guidelines and is suitable for most situations. For the most accurate and up to date guidance, contact your State Radon Contact.

START HERE and follow the arrows

Have you tested for radon before?

No

Use a Short Term Radon Test (2-4 days)

Yes

How long ago?

Less than a year ago

More than a year ago

What was your test result?

Below 2.0 pCi/L

You should test for radon every 1-2 years. Use a Short Term Radon Test to retest when necessary.

Above 2.0 pCi/L

Use a Long Term Radon Test (91-365 days) to confirm radon levels are below 4.0 pCi/L

Above 4.0 pCi/L

Was your test above 8.0 pCi/L?

Yes

No

Should I test for Radon in Water?

Click here for more information.

Use a Short Term Radon Test (2-4 days) to confirm radon levels are above EPA action level of 4.0 pCi/L

Use a Long Term Radon Test (91-365 days) to confirm radon levels are above EPA action level of 4.0 pCi/L

If your follow up test has a result greater than 4.0 pCi/L, the EPA recommends taking action to reduce your radon levels. How?
