Review Pros and Cons of Implementing a Wheel Tax in Rusk County.

Mike Hraban explained that there are eight or nine counties in Wisconsin that currently impose a wheel tax and that a \$30.00 wheel tax is the highest amount imposed that he has seen. This amounts to approximately 2.50 per month per vehicle. Hraban also explained that Eau Claire County is reviewing possible implementation of a wheel tax for their county highways and it's reported that the City of Eau Claire has now asked that they receive a portion of the wheel tax distribution for city streets also. Hraban reported that the current County "borrowed" bond money used for highway construction will be gone by the end of 2019 and the County will have to levy again for construction of highways in order to keep them from deteriorating.
