Property Owner _____
Mailing Address _____
City, State, Zip _____

Section 50-190(e) of the Rusk County Code of Ordinance requires that a plan to mitigate for the adverse effects of impervious surfaces greater than 15% within 300' of the shoreline shall be implemented concurrent with the expansion or improvement of impervious surfaces on the property. The plan and the compliance schedule shall be approved by the zoning administrator and recorded by the property owner with the deed to the property prior to the issuance of the related zoning permit.

The following must be submitted with all such projects:

- (1) A site plan completed by a Professional Land Surveyor showing property lines, total square footage of the lot, and locations and total square footage of all impervious surfaces.**

In addition, a property owner shall choose the number of points required by the Rusk County Shoreland Mitigation Guidebook. The practices shall be described here:

Owner agrees to mitigate, upgrade, restore and/or maintain all practices noted above in accordance with the Rusk County Shoreland Zoning Ordinance. Owner agrees to permit county officials charged with administering county ordinances to have access to the above described premises at reasonable time for the purpose of inspection to verify that mitigation practices are in conformance with this agreement and with the Rusk County Shoreland Zoning Ordinance.

Owner understands that surface water quality is affected by activities conducted on the land adjacent to water bodies, and agrees to maintain the mitigation practices in perpetuity. This agreement shall be binding upon the owners, the heirs of the owner and assignees of the owner. Should any owner fail to initiate or maintain the above mitigation practices, the permit issued for any expansion shall become null and void and any permitted expansion shall be removed at the expense of the owner. Further, owner understands that should the need arise, owner may change the way that mitigation points have been achieved, but only through a new mitigation agreement approved by the zoning administrator.
